

Keihin-Tohoku / Negishi Line

Introducing

The Keihin-Tōhoku line is a railway line in Japan's JR East network. It connects Ōmiya in Saitama Prefecture, Tokyo and Yokohama. The line, inaugurated in 1914, has been operating for over 100 years.

The line runs parallel to the JR Yamanote line between Shinagawa and Tabata stations. With a daily ridership of over 3 million, it is one of Japan's busiest commuter lines.

The Negishi Line is a railroad line in Japan's JR East network. It connects the stations of Yokohama and Ōfuna in Kanagawa Prefecture. There is no passenger service specific to the line: trains from the Keihin-Tōhoku line continue their service on the Negishi line.

This line is included in the basic set.

Key data

- Total length : 81.2 km

Features

Note that, because the safety system is the [D-ATC](#), the warning lights must be ignored and the Max Speed / Next Limit indicators are empty.

Note also that, because the Akabane station has landing doors, the margin of error is +/- 35cm (as on the Yamanote), regardless of the difficulty setting, but TASC data is not available, so it can't be used in this case.
