Tobu Skytree Line

Introducing

The “TOBU SKYTREE Line” is the nickname for a section of the 114.5 km-long Tobu Isesaki Line, specifically the segment between Asakusa Station in Taito Ward, Tokyo, and Tobu-dobutsu-koen Station in Miyashiro Town, Minami-Saitama District, Saitama Prefecture, as well as the branch line from Oshiage Station to Hikifune Station in Sumida Ward, Tokyo.The name “TOBU SKYTREE Line” has been in use since 2012 to commemorate the opening of the TOKYO SKYTREE. Although the line is connected to the Tobu Tojo Line via the Chichibu Railway, it operates as an independent line. It uses the TSP-type ATS (Automatic Train Stop) system for train protection.

This DLC features the upbound section (toward Asakusa) of the TOBU SKYTREE Line, covering the 29.7 km stretch from Kita-kasukabe Station to Kita-senju Station. The journey takes you through residential and commercial areas, then onto an elevated section that includes the longest quadruple-track section operated by any private railway in Japan. Along the way, enjoy distant views of the TOKYO SKYTREE and the impressive Arakawa River bridge before arriving at Kita-senju Station. Experience the vivid transition in scenery as you travel from the suburbs into the heart of the city.

Key data

- Total length: 29.7 km
- Number of stations: 12
- Safety system : TSP-ATS
- Train model : 10030 series (6 cars)
- Max speed: 100 km/h
- Max speed after signals:
  - Reduced speed (green/yellow): 75 km/h
  - Caution (yellow): 55 km/h
  - Speed restriction (yellow/yellow): 25 km/h
- Routes:
  - Kasukabe ~ Kita-senju (2524) : Section express train - 7 stations - 28.2 km
  - Kasukabe ~ Kita-senju (2604) : Section express train - 7 stations - 28.2 km
  - Kita-kasukabe ~ Kita-senju (3502) : Section semi-express train - 12 stations - 29.7 km
  - Kita-kasukabe ~ Kita-senju (5802 - fiction) : "Out of service" train - 4 stations - 29.7 km
- Automatic announcements: Yes
- Conductor announcements: Yes
- Driver announcement (pointing-and-calling): Yes

Particularities

Although stations with platform doors are present, TASC data is not available and cannot be used for these cases.
